Dear Hiring Manager,

I am writing to express my interest in the Full Stack Developer position at your organization. As a Full Stack Developer at **Svabag Labs**, I bring production experience in Golang, cloud infrastructure, and end-to-end application delivery.

Key highlights of my work:

- Built **20+ production REST APIs** in Golang (Echo) with MongoDB and PostgreSQL across 5+ microservices.
- Designed **CI/CD pipelines** using AWS CodeBuild, Docker, EC2, Nginx, and Kong API Gateway with JWT authentication.
- Architected a **real-time data ingestion pipeline** using Golang worker pools, Prometheus, Pushgateway, and Grafana — scalable to 1000+ concurrent streams.
- Set up **monitoring & alerting** with Grafana dashboards and Uptime Kuma for service availability tracking.
- Managed **Flutter app releases** (AAB/APK) and conducted **code reviews** for a 10-member team.

**Tech Stack:** Golang (Echo), Flutter, React.js, MongoDB, PostgreSQL, AWS (EC2, S3, CodeBuild), Docker, Kong, Prometheus, Grafana, Git.

What sets me apart is my ability to take full ownership across the stack — from writing backend APIs to setting up infrastructure and shipping releases. I thrive in fast-paced environments where I can build and scale products end-to-end.

I would love the opportunity to discuss how my skills align with your team's goals. Thank you for your consideration.

Sincerely,

**Akash Anumolu**  
Full Stack Developer
